Nine Nominated For Councillors

The nomination meeting Monday brought out a larger number of nominations for councillors than for many years. Nine candidates were nominated to fill four seats on the council.

Two candidates were nominated for mayor and four nominations were handed in for school trustees to fill three vacancies.

The following candidates were nominated:

For Mayor:

H. W. Chambers, nominated by Dr. J. L. Clarke and W. T. Pitt.

Dr. W. G. Evans, nominated by D. M. Sinclair and J. E. Gooder.

For Councillors:

C. H. Adshad, nominated by H. W. Chambers and C. S. Mortimer.

Roger Barrett, nominated by C. H. Adshad and J. E. Gooder.

Luke Collinge, nominated by J. A. Russell and A. Gale.

John H. Fleury, nominated by H. Hawkes and Dr. W. G. Evans.

Ward C. Keith, nominated by C. H. Adshad and J. E. Gooder.

Otto A. Kreuger, nominated by F. Reiffenstein and O. W. Stauffer.

William T. Pitt, nominated by W. D. Spence and D. M. Sinclair.

C. E. Reiber, nominated by H. W. Chambers and J. E. Gooder.

David M. Sinclair, nominated by J. H. Fleury and A. Gale.

For School Trustees:

J. V. Berscht, nominated by J. E. Liesemer and W. T. Pitt.

Dr. W. G. Evans, nominated by W. T. Pitt and J. E. Liesemer.

J. W. Walton, nominated by D. Geiger and E. V. Woodlock.

Cow Testing Association Meeting.

A meeting of the Cow Testing Association was held last Wednesday, with Mr. C. W. Gibbs in the chair.

Mr. Trimble, dairy promoter spoke and urged the members to work for an increase in membership. He pointed out the advantages of cow testing and stressed the fact that a few good cows were more profitable than a large herd of low producers.

It was pointed out that 15 per cent of the cows outside the Cow Testing Association were not paying for their feed, while only 2-1-2 per cent of cows within the Association were unprofitable.

Mr. C. A. Lyndon spoke on dairy economics and showed that proper feeding was essential to successful dairyming. He showed where a herd of eight cows fed on a straight grain feed had been made to double their production by feeding a balanced ration of grain and roughage.

Mr. Lyndon advocated alfalfa as one of the best feeds for dairy stock and stated that it could be successfully grown in Alberta. The lecture was illustrated by lantern slides and was very instructive.

The election of officers was left over to a future meeting.

John E. Liesemer, nominated by W. T. Pitt and D. M. Sinclair.

The retiring councillors, who are nominated for re-election are: C. H. Adshad, Roger Barrett and W. T. Pitt.

The retiring school trustees, who are nominated for re-election are: J. V. Berscht, Dr. W. G. Evans and J. E. Liesemer.

The election will be held Monday, February 13 from 10 a.m. to 7 p.m.

For mayor and councillors, only those whose names are on the tax roll, and those tenants and relatives who have registered, are entitled to vote.

Four councillors are required and it will be necessary for electors to vote four councillors (no more or less) in order that the ballot paper be good.

LOCAL & GENERAL

Let us remind you of the Saturday Night Dances, 25c everybody. The Bellamy Orchestra.

Fred Deidels and Dave Nelson have taken over a Texaco gas station on North Hill at 20th Avenue and 4th Street, Calgary.

A correspondent writes that the country people wish to thank the hotel management for the splendid rest-room provided for their use.

Bruce Clarke is the lucky local boy who made good by selling newspapers. He will be the guest of the Calgary Herald at the Banff winter carnival this week end.

Miss M. Saugstead entertained the Business Girls to bridge at the home of Mrs. D. McKee on Monday evening. Miss Laura Smith and Miss I. Grant took the honors.

Tommy Johnson and Ward Wyman left Sunday for Edmonton. Taggart with J. E. Hugot and Pat Rose, former Didsbury residents, they will form a rink to curl at the Edmonton bonspiel.

Don't forget to come to the Knox United Church anniversary supper, Monday, February 13th, 5:30 to 7:30 p.m. Everybody 25c. Bring your father and mother, sister and brother and sweetie.

Joyce was gay, reckless, unearring her riches behind everything but the love of her man. See "The Silver Lining" at the Opera House next Monday and Thursday. This is a story of Park Avenue and Poverty Row.

Mr. and Mrs. Chas. Wrightson and family are moving this week to take up their residence in Calgary. Mr. Wrightson is operating a meat market in South Calgary and we wish him every success in his new venture.

On account of the government requirements for the grading of eggs, the stores are not buying eggs, and all eggs are now being handled at the creamery. Mrs. I. Worley, of Calgary has been engaged as egg grader.

Critics of modern womanhood hold that this is an era of cosmetics and bobbed hair, short skirts and intellectual revolution. What do you think? See Dorothy Sebastian in her latest picture, "Ladies Must Play" a sophisticated comedy-drama at Didsbury Opera House tonight (Thursday).

A special double program at the Opera House for Thursday evening next! "The Silver Lining," a romance of modern youth, followed by Zane Grey's great western epic, "Riders of the Purple Sage." A heart-stopping story of the cat-trance, with whirlwind action and plenty of breathless adventures!

Mr. and Mrs. Wrightson Tendered Farewell

Mr. and Mrs. Charles Wrightson who are leaving to reside in Calgary were tendered a farewell by the St. Hilha's Chapter, O.E.S. at the home of Mrs. W. S. Durrer on Tuesday evening.

Mr. and Mrs. Wrightson, who have both been active in the work of the Order, were presented with gifts and received many wishes of future prosperity in their new home.

What was played and the honors went to Mrs. Ronnie, Miss Frances Durrer, Mr. W. S. Durrer and Mr. H. Morgan.

Community Hall School Fair

At the annual meeting of the Community Hall School Fair Association, which was held Wednesday, it was decided to again hold a school fair this year.

The schools which have already joined the Association this year are Rosbush, Mona, Juland, Neapolis, and it is expected that Grand Centre will also take part.

The fee for schools entering was placed at \$20.00.

The financial report showed that the society had a substantial balance on hand.

The following officers were elected: president, Mr. P. McNeil; vice-president, Mr. W. Bunce; secretary, Mrs. L. Holm; directors, Mr. D. Wilson, Rosbush; Mr. G. Clarke, Mona; Mr. P. Liesemer, Juland; Mr. E. Liesemer, Neapolis and Mr. E. K. Pratt, Grand Centre.

It was reported that Edith Pratt had won the girls' scholarship for the highest number of points gained at the fair, and that Lester Pross won the boys' scholarship. The scholarships entitle each of them to attend the short course at the Olds School of Agriculture next summer.

Grand Centre school was reported the winner of the school diploma for the largest number of prizes won.

Mr. John Liesemer Withdraws

Late Wednesday morning Mr. John Liesemer withdrew his nomination for school trustee. As a result there will be no school election.

United Church Board Meeting

The official board of Knox United Church met Friday afternoon, when representatives from Didsbury, Westcott and Westerdale were present. Rev. A. J. Mitchell presided and Mr. J. W. Walton was elected secretary. Mr. H. W. Chambers reported favorably on the missionary and maintenance fund, \$267.00 having been sent to Toronto. He was re-elected treasurer of the fund. Dr. Clarke was elected as presbytery representative.

It was agreed to ask Mr. A. W. D. Mitchell to take the services at Westcott and Westerdale during his father's enforced absence. It was also decided that a united service will be held on the last Sunday in each month in the afternoon at 2:30, when the country congregations will attend at Didsbury, the evening service being withdrawn that day.

The following officers of the board were elected for 1933: chairman, Dr. Clarke; secretary, Mr. W. A. Austin; treasurer, Mr. J. W. Walton.

Knox United Church Anniversary Service

The anniversary service will be held Sunday, February 12th at 7:30 p.m. in Knox United Church.

Rev. T. T. Faichney, B.D., of Calgary will preach, his subject being "The Oxford Movement."

The anthem, "Praise The Lord" will be rendered by the choir.

A supper will be held in the church Monday night February 13, admission 25c., after which Mr. Faichney will give an address. All are heartily invited to both gatherings.

Less Criticism: More Co-Operation

Within a few days Parliament will re-assemble at Ottawa after a long Christmas and New Year adjournment, and almost simultaneously the Legislatures of all the Western Provinces will meet in annual session. In view of conditions at present prevailing, people will manifest a deeper interest in the proceedings of their elected representatives than is usually the case. When times are prosperous and everybody busy, people are inclined to let their Parliament and Legislatures very much for granted, but with the times temporarily out of joint, people not only take a greater interest in public affairs, but adopt a much more critical attitude.

At the very time this more critical attitude develops, and when many people are inclined to demand and expect the impossible of their public men, the very conditions which develop this attitude of mind also create problems extremely difficult of solution, notwithstanding the best intentions and keenest desire on the part of members of Parliament and Legislatures to sincerely grapple with and solve them. In their impatience for definite and immediate results, many people adopt a most unfair attitude towards them in whom the nation has reposed its confidence and who, like the masses of the people, are anxious to do the best they can to overcome existing difficulties and right existing wrongs.

True, public men differ in their views as to what should be done, but in this they merely reflect the general public, and in these times it is almost impossible to find any two neighbors actually agreeing upon policies and methods that should be adopted. True, too, public men in their endeavors to find solutions make mistakes, but in this they are not one whit different from the average man who today may be vigorously criticizing and condemning legislators for their mistakes. Because of the very magnitude and complexity of the problems now confronting the country, and many of which cannot be solved by any one Province or nation, but only through united action by all nations, men occupying representative and responsible positions are deserving of sympathy, consideration, co-operation and support.

When Parliament meets it will have the Duff Commission report on the railway problem to deal with. In striving to reach a solution of this large and intricate problem, some things will, no doubt, have to be done which will not be pleasing to this interest, or class, or community. Any solution will involve inconveniences and sacrifices, and if such interest, class or community adopts a purely selfish attitude and emphasizes its own particular rights and privileges to the extent of ignoring the benefits to be conferred upon the whole country, then there can be little hope of any solution being reached.

At this time, as was the case during the war, individuals and committees must take the broader viewpoint of the welfare of the whole country. Our Parliamentary representatives must approach the problem from that standpoint, rather than from the standpoint of their individual constituency. And this general statement of policy is likewise applicable to other large issues which now face Parliament. None of them can be decided upon local or provincial viewpoints; they must be dealt with as national problems. If people generally will keep this idea firmly fixed in their minds there will be less tendency to indulge in criticism, and the finding of solutions made much easier.

In our Western Legislatures major questions that will call for consideration and action include the drafting and passage of wise and effective legislation dealing with such matters as adjustment of debts, arrears of taxes, balancing budgets, measures to alleviate unemployment, and to provide adequate relief where needed, while at the same time not further increasing the burden of taxation already placed beyond the ability of the people to carry. To these matters our legislators, in the exercise of party affiliations, may, we believe, be trusted to bring their best judgment in really sincere efforts to find the very best policies and put them into effect.

Respective of what is done, or not done, there will, of course, be some dissatisfied people. Possibly, everybody will be more or less dissatisfied. Where one approves of what is done, others will disapprove, while in regard to something else those who first approved will disapprove, and those who disapproved will approve. It is only in a democracy that this sort of conflict of views and opinions that compromises emerge, and it is only through compromise that democratic representative government can be carried on. It is always the average view that must prevail for the average good, not the extreme views either of the right or the left.

The thought we wish to emphasize and leave with our readers is, that the responsibility for successfully "carrying on" and "carrying through" these troublesome issues does not rest solely upon members of Parliament and Legislatures. It rests equally upon the individual citizen. Instead of adopting a whole critical attitude, a fault-finding attitude, the individual citizen should extend friendly advice and assistance to his elected representative, and should co-operate with him in the common endeavor to work out what is practical and best for all, whether it is everything such citizen favors and desires or not. Only so can the best results be achieved in times of stress and difficulty like the present. Only so, in fact, can a maximum of wise policies and good government be attained. It is not good citizenship, but the reverse of it, to make demand for impractical, impossible policies, and then to criticize and oppose what actually is done.

This is a time for all to work together, whether in government or opposition. They need not necessarily merge into one; in fact such a merging might be a mistake because constructive criticism is more important than mere neutral times, but all criticism should be constructive, and co-operation should be the order of the day. And it should be exercised fully and completely by the individual citizen who is expressing such action by his elected representatives in Parliament and Legislature and municipal council.

Was So Short of Breath Could Not Lie Down to Sleep

Mrs. P. J. Chernoff, Shoreline, B.C., writes:—
"I had been so troubled with attacks of heart I could not lie down to sleep."

"I couldn't do any hard work, or climb the stairs, and had nervous and smothering feelings, and became very weak."

"I tried all kinds of medicine, but could get no relief until after I had taken three boxes of Milburn's Heart and Nerve Pills, and since then I have felt better in every way."

This is a real drug and general store, put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Looking Into the Future

Dean Ingo Draws Another Gloomy Picture

Dean Ingo drew a picture of England 1,000 years hence when speaking in London recently. He considered that by that time England would have a population of only 20,000,000—about half the present population—and that they would live mainly in villages.

"Physicists and astronomers tell us there is no reason why this planet should not be habitable by human beings a million years hence, but whether the human beings will be at all like us and recognizable as men is very difficult to say," he said.

"London may be a hundred feet under water 3,000 years hence, and another ice-age is due at some period which may make these islands uninhabitable."

"I do not think it is at all possible that we shall ever colonize Mars and Venus or that we shall ever be inter-continental. I do not think many people believe in the canon which an ingenious American saw there."

"As for Venus, there is some reason to think the whole planet is under water. We might have one nice hot bath there before being devoured by a dinosaur. Besides, there is the impossibility of ever getting there."

The Dean said that our race had not intrinsically made any progress since the discovery of tools. Skulls of 40,000 years ago which had been found seemed to have brains as good as our own.

The changes going on were for the most part, he said, contracted with our jaws were getting narrower.

We were becoming blinder. Possibly our sight and hearing were not so good as those of the savages.

Our sense of smell was less keen, and we were losing our claws and fur.

Return To Battle

Balkans Are Considering Swine As Medium For Exchange

Cash money has become so scarce in Central European countries that a return to barter, with swine the medium of exchange has been inaugurated and may be extended in parts of the Balkans.

At Kragujevac, in Jugoslavia, the authorities have contracted with an Austrian firm for 100 carloads of Austrian pigs needed in the arsenal there. These will be paid by delivery in Austria of 10,000 Jugoslavian hogs. Meantime negotiations are underway between the National Railways of Czechoslovakia and Hungary. Under the present arrangement each line receives payment for mileage on its tracks paid by the other lines. The monthly balance due Czechoslovakia from Hungary is running about 1,000,000 Czech crowns a month. Hungary has refused to pay, and has offered to settle monthly with Hungarian pigs.

Landing Field Part Of Cruiser Equipment

Swedish Ship Under Construction Will Be Up-To-Date

Equipped with its own landing field the Swedish cruiser, "Gotland," now under construction, will be an interesting experiment in sea warfare. The landing field astern will be a wide, heavy strip of canvas, which will pack up as a regular mat and will fold full speed. The planes will run up on the outer end of the strip which will rest on crosswise pontoons. Then the planes, with folded wings, will be hoisted up the canvas incline to the deck by a hoisting crane. To launch the planes a rotating catapult will be employed which can shoot the planes into the air even against a contrary wind.

"I'm afraid the car does not suit me," wrote the new motorist. "My fiancee carried round the brakes and the steering wheel at the same time." "The car is perfect," wrote back the agent. "I suggest a new girl."

During the year ending December 31, 1931, Saskatchewan shipped 297,569 tons of traffic east from local sources to supply fuel needs in the province of Manitoba.

W. N. U. 1977

Armament Expenditures

United States Appears To Be the Most Guilty In This Respect

The Institute for the Disarmament of the United States, official and unofficial President Hoover, Mr. Stimson, Senator Borah and apparently three out of four newspapers in the country—that the debtor nations must reduce their outlays on armaments before they can talk revision of debts with the United States, has drawn the report from the Paris press that the greatest sin in the way of outlays on armaments in the United States itself, "Le Temps" gives these comparative figures:

"The President of the United States insists that what he believes is a formidable increase in military expenditure constitutes one of the most important factors in the world-wide disequilibrium of national budgets with an unfavorable effect on credit and on monetary systems. But no country in the world has increased its military expenditure to the same proportion as the United States have increased theirs, even though their country is not exposed to any danger as its only pre-occupation has been to obtain parity with Great Britain."

"In 1916 the military and naval expenditure of the United States was \$267,000,000. In 1930, according to figures communicated by Washington to Geneva, the total figure had reached \$700,000,000."

Find Fossil Bed In West

Evidence Of Prehistoric Age Discovered Near Swift Current

Discovery of a new locality for fossil mammals in Canada is announced by Dr. L. S. Russell and Dr. R. T. D. Wicken of the geological survey, Department of Mines, Ottawa.

Working in the vicinity of Swift Current, Sask., these two government paleontologists obtained a small collection of fossil teeth, which proved to represent animals of late eocene times, not previously found in Canada. Such fossils have been found in Utah, and have been more recently discovered in southern California.

The Saskatchewan collection includes teeth of a rhinoceros, of a three-toed horse, primitive ante-lope-like creatures, and a forerunner of the squirrel. Most interesting is a single rabbit tooth, one of the oldest known records of such animals.

The fossil-bearing beds are part of a great sheet of coarse-grained rocks extending over the Cypress Hills and eastward to Swift Current, and resting on an irregular surface of the older formations. There are indications here that southern Saskatchewan during the early part of the age of mammals had valleys and uplands differing in elevations by as much as 1,400 feet.

Landlord Accepts Vegetables

Fruit Also Helps Pay Rent In New South Wales

If people in New South Wales cannot pay their rent in cash landlords are accepting butter rather than turn them out. Potatoes, turnips, melons and pumpkins are being paid for a hut and five acres of land. One tenant gave his landlord more than 160 casks of fruit, and still is settling each week in fruit. A man in Parramatta pays his poultry and eggs, and his landlord sells them in his produce shop. An Australian mechanic supplies the owner of his home with milk and eggs, and has offered to keep his car in condition. Another householder had valleys and uplands differing in elevations by as much as 1,400 feet. The War Service Home Commission balked when a tenant started to deliver several hundred pounds of pumpkins.

A Floating City

Among the "comforts" provided for passengers on the new French liner "Normandie" are a theatre, a church, a "street" of shops, cafe, dance salon, winter garden, and a garage. The ship also has six separate wireless installations on board.

Australia is sometimes called the "shadesland." The leaves of some of the trees there are so arranged as always to prevent their edges to the sky.

ACTS TWO WAYS AT ONCE

Beautiful Cape Town
South African City Has a Noble Setting and Wonderful Climate

It may be truthfully be said that few places in the world compare with the Cape Peninsula, South Africa, either in scenery, climate, verdure, woods, water, salubrity, or association.

Table Mountain, upon which Cape Town rests its shoulders while its feet dangle in Table Bay, throws its ever-changing shadows upon a land of trees, flowers, odorous plants, oak groves, pine woods, beautiful hills and arm-furnished valleys. In all the world there is, perhaps, no city so absolutely beautifully located as Cape Town. A nobler site for a city could hardly be imagined. It rivals Gibraltar and Constantinople, Bombay and San Francisco. Immediately behind the town, which lies above the sea, the majestic mass of Table Mountain rises to a height of 3,500 feet, a steep slope capped by a long line of sheer precipices more than 1,000 feet high, and to the right and left by bold, isolated peaks. The beautiful sweep of the bay in front, the towering crags behind, and the romantic pinnacles which rise on either side make a landscape of unusual grandeur.

Cape Town enjoys a most equable climate. There is a wealth of sunshine at all seasons of the year. The breeze blowing fresh from the sea tempers the rays of the African sun.

Passengers on the "Carinthia" cruise around the world via the Southern Hemisphere will reach Cape Town on the 18th of next April. Visitors will be amazed at the vast variety of orchids that grow wild all the way from the outskirts of Cape Town to the tops of Table Mountain. Some people may be content with viewing and admiring the gorgeous display of flowers offered for sale in the attractive booths on Adderley Street, but to properly appreciate the exquisite beauty of the Peninsula flowers they should be seen growing in their natural habitats.

One of the strange flowers found is the parasitic "Harveya," whose delicate stems turn black if touched. Another is the "sunflower" whose leaves are covered with sticky glandular hairs for catching insects, on which it seems to feed.

Cape Town is in the same latitude as Montevideo, Uruguay, and Sydney, Australia.

Imperial Airways Record

Imperial Airways have cleared their inception, down just on 10,000,000 miles, and have carried over 200,000 passengers and more than 6,000 tons of mails, parcels, and urgent freight. From the all-important aspect of reliability, the figure for flights completed to schedule has risen from 75.3 per cent in 1924 to 96.16 per cent in 1932.

World Has Still Much To Learn About The Production And Distribution Of Our Food Supply

Some day when dreams of internationalism come true and the world is just one big neighborhood, folks will marvel at the confusion reigning today over the production and distribution of foodstuffs. It is probable if political interference were abolished and adequate international currency facilities were instituted, that production of necessities by cultivation of the soil would settle to a beneficent normal pretty shortly. Every last human being would have food to eat and to spare and starvation and disease from malnutrition speedily would become unknown.

But in the crazy system now prevailing in the world, we have all sorts of policies in force either to spur on reluctant production or to curb production where the bounties of earth are easily and naturally obtained. The American Congress has tried to secure adequate rewards for American farmers if they will not produce too much. Over the greater part of Europe governments are using the people's money to stimulate farm production so that they need not buy from nationals other than their own.

Great Britain, through a complicated tax system, virtually is paying a bounty for the growing of wheat in the British Isles. Germany and Italy and France are providing, at public expense, rewards for increased production of farm products. The Netherlands government is experimenting with price fixing to encourage wheat growing. On the other hand, Netherlands regulations would check the raising of too many hogs by turning in a limited number of tags to hog raisers and requiring every such animal going to market to be tagged, as is the practice in this country with broodstock. To maintain the price of coffee, resorts to the ridiculous system of pegging the price by the government buying and then destroying all supplies.

The human race can hardly boast of its wisdom while it resorts to such uneconomic practices in managing its food supply while millions of its members are not well fed. Detroit News.

Legends Are Mere Myths

Tree, Credited With Magical Powers, Are Quite Harmless

The man-eating tree of Madagascar which an explorer has announced he is going to cut is one of the world's harmless myths. Quite obviously a tremendous exaggeration of such familiar insect-eating plants as the sundew and the Venus fly-trap, it has been used for generations by Madagascans to fool credulous people.

The legend of the deadly upas tree of Java is another similar yarn. The guileless-looking Malay tells the visitor of a tree so poisonous that its very "breath" kills all plants and animals for miles around. Actually the upas tree ("upas" is Japanese for "poison") exists, but it is easy to approach, and its poison has to be jabbed into you on an arrow point to do you any harm.

Wheat Shortage In Roumania

School children, theological students, police and soldiers in Roumania will have to write bread until next harvest. It has been discovered that the wheat crop is shorter than expected. The minister of public instruction has advised boarding schools to serve rice, bread and "marmalade" a stiff porridge.

"Henry" and his warring wife as she prepared to retire. "Is everything shut up for the night?" "That depends on you," muttered Henry. "Everything else is."

Sister: "Oh, I am seeking your daughter's hand or have you any objection, sir?"

Father: "None at all. Take the one that's always in my pocket."

W. N. D. 1937

Market For Alfalfa Hay

English Dairyman May Import It As Feed For Calves

Sale of alfalfa meal and alfalfa hay have never been extensive in the West of England, but increasing interest is being shown in both these products recently. In view of the fact that in the West of England and South Wales clover mixture is solely in demand as a feeding stuff, alfalfa hay not being favored, it is interesting to learn that the Gloucestershire Milk Receiving Society have been conducting experiments with alfalfa hay as a feed for calves, and they are of the opinion that it may increase the butter fat content and improve the color of the milk. There is a possibility that if this becomes popular they may import alfalfa hay. California alfalfa hay is quite out of the market owing to the adverse exchange situation. South African meal, however, is not affected and it is said to be of a deeper green color than that from Canada and is, therefore, well liked. Last year there were certain imports from Canada which have been apparently quite satisfactory.

Present prices which are being offered for the South African meal with a fibre content of 25 per cent range from \$20.12 to \$20.40, having exchange at \$3.80 to the pound sterling per ton of 2,240 pounds, c.i.f., London or Liverpool. Supplies from Canada have an advantage in this market over those from South Africa, as very few South African vessels call at Avonmouth, where a continuous service is provided between this port and Canadian ports. Recently offers of Canadian alfalfa meal have been made at \$25.17 by consumers, which would mean about \$24.70, c.i.f., Avonmouth, to the shipper. In addition to its being a deep green color, importers insist that the meal be finely ground, but not dust, and that leaf and not stalk be used for grinding purposes.

Oil Penetrates Metal

Amazing Discovery May Recently Made By Two Experts

Discovery that oil penetrates metal instead of merely forming a clinging film on its surface, as formerly supposed, may improve lubrication methods. According to two experts, who recently reported their surprising find, oil may be wiped from the surface of a bearing, and a new film will soon appear.

"Not a bad novel, but I only publish works of men with well-known names."

"That is all right my name is Smith."

Gregory I., a follower of Bonaparte, made Pope in 590, was the first monk to take the papal office.

New Photographic Telescope In California Will Bring Planets Into Close Range Of Vision

Strange Strain Of Cattle

Native To Philippines, Cannot Live Without Salt Water

From the Philippines, United States Protection in the Pacific Ocean comes word of a strange strain of cattle which cannot live without salt water.

Dr. Emano Samson, supervising veterinarian of the Philippine Bureau of Animal Husbandry for the district of Zamboanga, has submitted the first formal report on the extraordinary salt-water cattle of the Sulu Islands.

The animals require brackish or even sea water to survive and have long been a puzzle to scientists. A series of experiments was conducted in which it was established that these cattle, if removed from the salty marshes of Sulu, near Jolo, and put upon fresh water and normal pasturage, die within a short space of time.

Fresh water is not obtainable on the small islands to which they are indigenous, and it is the belief of Dr. Samson that they offer an interesting study in natural accommodation to prevailing conditions. Converse experiments were conducted and cattle, horses and goats taken to these islands. They are reported to have accommodated themselves quickly to salt water and the prevailing pasturage and eventually to have thrived. So far, however, all attempts to transplant the truly native stock to other and presumably more favorable conditions have resulted in failure.

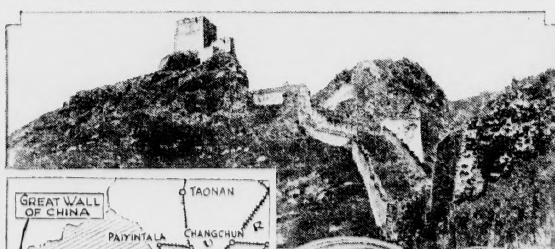

The meat of the salt-water cattle is darker in color than that of freshwater varieties and is not easily susceptible to refrigeration. The commercial market is restricted to the Sulu group, but the Bureau of Animal Husbandry hopes eventually to establish some type of refrigerating station near the islands so that it can be put on the Manila market.

C.N.R. Rails For Japan

More than 200 miles of second hand rails were shipped to Japan from Saint John, N.B., in the steamer "Ferdinand." The rails, weighing 1,750 gross tons, are under standard gauge and represent replacements on the Canadian National lines in New Brunswick, Nova Scotia and Prince Edward Island during a period of over three years.

The Central Railway of Peru was constructed between 1871 and 1891, and has 152 tunnels and bridges along its course.

JAPANESE CONSOLIDATE MILITARY POSITIONS—CHINESE RETURN FIRE

Here is a section of the Great Wall of China at its strongest point outside the city of Shanhaikwan. It is here that Japanese tanks and artillery made a breach and stormed the city, inflicting severe casualties on the Chinese defenders. The map shows the general location of the latest "war area." Shanhaikwan, as can be seen, is the gateway to Jehol Province. Inset, lower left, is General Yoshinichi Suzuki, who commands the Japanese forces at Shanhaikwan, and at the right is Marshal Chang Hsiang Liang, Chinese commander, whom the Japanese blame for the overt act that started hostilities.

The moon and some of the planets will be brought theoretically to within 25 miles of the earth by the new 200-inch photographic telescope at the California Institute of Technology at Pasadena, California, according to Dr. Frederick C. Leonard, head of the department of astronomy.

It may be possible to distinguish objects 20 feet apart on the moon's surface by employing a magnification of 10,000 diameters in the giant telescope. Ordinarily much smaller magnification is used because of atmospheric conditions. However, with proper atmospheric surroundings, the greater reflection range would enable astronomers to view the moon and other heavenly bodies at extremely close range.

This telescope is designed to collect and photograph in a unique manner a vast field of heavenly bodies. However, the machine can be adapted for direct observation.

Mount Wilson Observatory, where the 100-inch telescope is located, now the world's largest, is just a few miles from the California Institute of Technology. The institute and the observatory collaborate on astronomy research and findings.

Dr. Leonard pointed out that estimates have revealed that there are in the neighborhood of 500,000,000 stars brighter than the nearest magnitude, which is the visual field limit of the 10-inch telescope. Although no estimate has been attempted as to the possible scope of the 200-inch instrument, Dr. Leonard declared that probably a billion and a half stars would come within its range. Hence the giant telescope will reveal about as many stars as there are people on the earth. The photographic lens makes possible the recording of a far greater number of the heavenly bodies than can be detected with the naked eye, to which only about 6,000 stars are visible, Dr. Leonard said.

A telescope is designed to collect light and not to magnify, as is commonly supposed by the layman, the scientist explained. It can be compared to a funnel, collecting light and concentrating the rays in a small beam to be in turn directed to the eye of the observer or to the photographic plate. In fact, making stars appear nearer and larger is a secondary purpose, Dr. Leonard explained.

Should a star suddenly be destroyed and cease to give off light rays, it would be millions of years before the planet would be invisible to people on earth. This is due to the fact that light rays now leaving the stars will not reach the earth for ages to come.

In describing telescopes, Dr. Leonard explained that there are just two principal types—refracting and reflecting. The refracting telescope is similar to open glasses, and is composed of a large double convex lens, or object glass. This glass, located at the upper end of the instrument tube, gathers light from the stars, concentrating the rays to the eye of the observer.

The reflecting telescope is composed chiefly of a large concave mirror, silvered on the front surface rather than the back, as with ordinary mirrors. This mirror is mounted at the lower end of the tube in the reflecting telescope.

Seven Is Lucky Number

Replaces Thirteen With Gamblers At Casino Along Riviera

There is a craze for number seven among gamblers at the casinos along the Riviera. They maintain that seven has replaced thirteen as a significant number, pointing out that all France's great tragedies last year occurred on the seventh of the month, "Thursday."

On January 7, M. Maginot, Minister of War, died.

On March 7, M. Briand died.

On May 7, President Doumer was assassinated.

On July 7, the submarine "Pamphile" was lost.

The tragedies happened in each alternate month.

**Didsbury Lodge No. 18, I.O.O.F.**

Meets the 1st and 3rd Thursday in each month.
Visiting brothers are welcome.

Sunnyslope Celebrates "Burns Night."

Sunnyslope's first "Burns, Night Banquet" was a great success over ninety people being present. Mr. Robert Milne was chairman and genial toastmaster.

The Haggis was played in by Mr. Scott and Mrs. Stearns, and Mr. James Lochie gave the "Address to the Haggis."

In response to the toast of "The Immortal Memory," the speaker of the evening, Mr. Robert Davidson, of Three Hills gave a splendid address on "Burns, From the Cradle to the Grave." Everyone present was delighted with the thirty-minute talk and some of the oldest Scotsmen stated that they had never heard a better address on Burns.

In proposing the toast "To the Honored Guests" (Messrs. Robert Davidson and John McAlpine), Mr. Bob Milligan spoke in appreciation of Mr. Davidson's interesting and educative address, and speaking of Mr. McAlpine, he referred to him as the oldest resident of Sunnyslope, the eldest Argyshire man in this part of the province, and also a veteran of General Custer's army. He expressed the wish that "Mac" would be present for many such celebrations.

Other features of the evening were songs by Messrs. Ed. McKay, Ben Halbert, Bob Milligan, the Misses Lochie; recitations by Messrs. Robert Milne, James Lochie and Dave Yelloweas, and a sword dance by Miss Tainish.

After the banquet Scotch dances were enjoyed until the " wee sma' hours."

Is Spring Here?

The temperature Monday morning did not at all indicate that spring was near at hand, but Mr. E. Roper reported that he had seen five robins in the brush in east Didsbury on Monday morning.

Several days ago farmers living east of town saw gophers running on the road and reports come from Calgary of bluebirds being seen.

Any ground hog that was around these parts must have seen his shadow on ground hog day, which is supposed to mean six weeks' more winter. Which guess is right?

Legislature Opens.

The third session of the seventh legislature opens February 9th, and it is expected that the program of legislation will be light. Two new members will take their seats this session, namely, C. A. Rouning, the U.F.A. member for Camrose, and Norman Hindsley, the Independent member for Calgary.

WORLD HAPPENINGS BRIEFLY TOLD

Following a three months' adjournment the joint committee which is investigating the administration of the Pension Act re-assembled in Ottawa.

W. Martin Gilpin, K.C., Vancouver, has been retained by the Dominion government to revise the Canada Shipping Act. He has gone to Ottawa to undertake the work.

St. Hubert Wilkins, noted British explorer, and he planned to leave the United States in April for Norway to join the Ellsworth-Balchen expedition to the Antarctic.

Amendments to the Canada Shipping Act are being drafted. The legislation will be brought down this session. The measure will be laid out from the previous session.

Charles Wong, first Chinese to receive a private telephone plant's license, is leaving Winnipeg for China where he will join the Chinese government air force.

Sailing alone in an 18-foot skiff, Fred Robell, Australia's "light of jelly" navigator, put in St. Paul, California, January 9, after a year-long, 9,000-mile voyage from Sydney.

Canadian water colors will be exhibited in at least 12 of the largest cities in Great Britain in the next year and a half, officials of the National Gallery stated at Ottawa.

Julius Montagu Williams, scientist, lecturer, picture-maker, misadventurer, of another day among the Indians of Northern Ontario, Alberta and Saskatchewan, died suddenly in Toronto in his 76th year.

International debts may be used by the United States to reduce trade barriers against the products of that country, according to the opinion expressed by Premier Borden during an interview at Winnipeg.

Prof. John H. Williams, one of the American delegates to the preparatory committee for the world monetary and economic conference, told the committee that he believed long protective tariff settlement in the United States is abating.

Flight Scheme Dropped

Professor Piccard Will Not Ascend From Hudson Bay District

Canada's Hudson Bay district will not see a flight to the stratosphere by Professor Auguste Piccard after all. The famous explorer of the upper regions is in New York where he starts a series of lectures.

The reason he will not make the Hudson Bay attempt himself, he explained, is because "the men who make the flight won't be acquainted with the northern regions."

"The greatest difficulties of that attempt would be landing in that remote region and transporting the apparatus and equipment," he said. "A system of airdrop for gliding has been planned from the ground by airplane must be used."

First of all, Professor Piccard said, it would be necessary to find a man "with a big pocketbook" who also had a genuine, intelligent interest in scientific matters to finance the expedition.

Tribute To Queen Mary

Good Example As Housewife Opinion Of Her Treasurer

Queen Mary is "too good a housewife" in the opinion of Sir Edward Wallington, who at the age of 73 years, has just retired from the post of Treasurer to the Queen.

"I have paid all the Queen's private bills since my appointment 13 years ago," says Sir Edward, "and not once had I to query her accounts. She is an example to the housewives of Britain for wise shopping, careful spending and discriminating choice."

No Mishaps In Air

Vancouver's Sea Island Service Had No Accidents In 1932

Vancouver's sea island airport carried on its activities during 1932 without a single accident, according to the report of Manager William Macpherson, to the civil airport committee. Passenger flights for the year numbered 767; test flights, 40; student instruction flights, 734; student solo flights, 1,829; arrivals, 309; departures, 310; visiting aircraft, 131; and passengers carried, 2,652.

A SLENDERING STYLE YOU'LL LIKE

Its smart tailored lines meet everyday requirements. Almost any of the soft new weaves are lovely for this model, a very becoming style for the normal or slightly over-weight figure.

You'll notice that since the center of the crossover button is cut in a point effect and left button, it combines with the skirt panel to add height to the figure.

It's a crisp, full skirt to be equally suited to this model.

Style No. 313 is made in sizes 36, 38, 40, 42 and 44 inches bust.

The material was in the popular knit tone in a diagonal woven weave. While pattern was used for the final vest.

Size 36 requires 2 1/2 yards of fabric with a yard 20-inch wide.

Price of pattern 20 cents in stamps or coin; cash is preferred. Wrap coin carefully.

How To Order Patterns

Address: Winnipeg Sewing Union, 175 McDermott Ave., Winnipeg

Pattern No. 313 is \$1.00

ARM NUMB WITH RHEUMATISM

Woman's Thanks to Kruschen

"I have been suffering from rheumatism for years. At one time I could scarcely walk with pain in my feet. The thumb of my left hand was so stiff I could only hold it with the aid of the right hand. I was afraid to go to bed, as my right hand and arm up to the elbow used to numb, and the pain was just terrible until I got the circulation going again. I started to take a half-teaspoonful of Kruschen in a glass of hot water before breakfast, and believe me I feel a different woman. I tell everyone what I take, and the good it has done me."—J.M.A.E.

Kruschen contains six mineral salts which line up the liver, kidneys and stomach and keep them working smoothly and efficiently. The reward of this internal cleanliness is a freedom and invigoration bloodless from poisons, uric acid is expelled through the natural channels, and the pain of rheumatism ceases. And as you continue with Kruschen, your whole being body and brain responds to its purifying force.

More Employed In England

Activity In Several Lines Of Work Shows Increase

Employment is improving in England. The number of registered unemployed decreased by 35,319 between November 11 and December 19. The increase is credited to the usual seasonal improvement but in several lines of work activity has increased.

More employment is reported in engineering, metal and steel industries, general engineering, cotton and putty trades, tailoring, bookbinding and dyeing, finishing works, distributive trades and hotel and boarding house services.

Less employment is reported in building jobs, public works contracting, pottery, food and the industries, heavy manufacturing and the woolen and worsted industry.

Ski Jumpers Buy Snow

Illinois Club Ordered Six Car Loads From Wisconsin

It may not have snowed in sufficient quantities for ski jumping, but the Chicago club had snow for its annual tournament at Gary, Ill., on January 15.

After canvassing the region, club officials learned that there was plenty of snow about 100 miles north of Chicago, up in Wisconsin, and placed an order for six freight car loads.

The science of lighting fire has become so specialized that the fire departments of large cities are organizing fire colleges to train their men.

A Quick-Witted Guide

Showed In Clever Way He Knew King Of Belgium

A new story is told about King Albert of Belgium. He is a notably modest monarch, and often travels incognito. One of his hobbies is Alpine climbing. He sometimes sets out with a simple rucksack firmly convinced that his mountaineering recognizes him, and calling himself Monsieur Durand, a name as common in Belgium as Smith in England. On a recent mountain trip the King took with him a guide who showed no sign of recognizing him. He was climbing in the neighborhood of a peak which in his honor has been renamed Mount Albert. Stopping for a rest on his way the King questioned the guide about the names of the various mountains, and finally to put his incognito to the test, pointed to his own mountain. "And that," he said, "is Mount Albert, isn't it?" "No, Monsieur," answered the guide, "that's Mount Durand."

Royal Command Has Lasted

Queen Victoria Set Height Limit For London Buildings

A Queen's wish has kept the London "sky line" close to the ground. The story of that wish, by which no London building can be built higher than 80 feet to the top of the parapet, with two stories in addition, has been laid before the Royal Society of Arts.

It was told by Maurice E. Webb, architect, who said that Queen Victoria, gazing out of her window in Buckingham Palace one day, was struck with the height of Queen Anne's Mansions.

This building, still one of London's highest, towered above Westminster's smaller dwellings.

She sent for her minister, and insisted on a height limit being included in the building act. The royal command has lasted through the years.

A Matter Of Taste

When you're a married man, Samuel, you'll understand a good many things as you don't understand now, but rather it's worth while going through so much to learn so little, as the clergyman said when he got to the end of the alphabet, is a matter of taste. I rather think it isn't. — Charles Dickens.

Nose rings, like those worn by African slaves are said to be the fashion in Paris.

London had 4,562 fires, with an average damage of \$750 per year.

Glasgow, Scotland, will appoint a woman police sergeant.

Try Miss McFarlane's Favorite Recipe for BISCUITS

4 teaspoon salt 4 teaspoon Magic Baking Powder
2 cups pastry flour or 1 1/2 cups 2 tablespoons (baked flour)
3/4 cup milk, or half milk and half water

Sift together flour, baking powder and salt. Cut in the chilled shortening. Now add the chilled liquid to make soft dough. Tow dough onto a floured board and do not handle more than is necessary. Roll or pat out with hands to about 7/8 inch thick. Cut out with a floured biscuit cutter. Place on slightly greased pan or baking sheet and bake in hot oven at 450° F. 12 to 15 minutes.

"For Light, Flaky Biscuits use Magic Baking Powder,"

says Miss M. McFarlane, dietitian of St. Michael's Hospital, Toronto

I RECOMMEND Magic because I know it is pure, and free from harmful ingredients."

Miss McFarlane's opinion is based on a thorough knowledge of food chemistry, and on close study of food effects upon the body. On practical cooking experience, too.

Most dietitians in public institutions, like Miss McFarlane, use Magic exclusively. Because it is always uniform, dependable, and gives consistently better baking results.

And Magic is the favorite of Canadian housewives. It outdoes all other baking powders in making.

You'll find Magic makes all your baked foods unusually light and tender... and gives you the same perfect results every time.

Free Cook Book—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Baking Ltd., Fraser Avenue and Liberty Street, Toronto, Ont.

An Artificial Heart

Device Has Been Developed and Tested By Moscow Surgeons

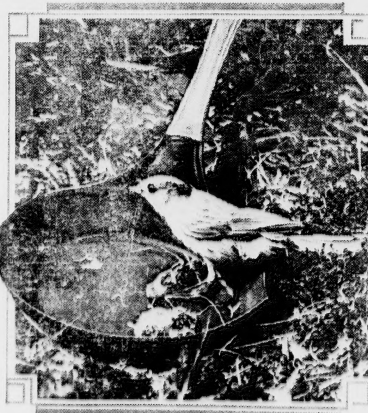

An artificial heart has been developed by Moscow surgeons, which, when perfected, is expected to revolutionize methods of operating on the heart. It is a device for pumping the blood through the arteries like a real heart. The heart of a living dog was taken right out of its body and operated on while the "artificial heart" kept the body alive. Sixteen stitches were taken in the heart and then it was put back into the body. The dog has survived.

Many new gold-digging machines are being reported in New Zealand.

+ Do You Know? +

WHAT the tamest bird in the woods is the Canada Jay? It is sometimes called the "Whiskey Jack" and is nearly always to be found around logging grounds or deserted lumber camps. Its latter fact may account for a superstition among many old lumber jacks in northern Canada that the Canada Jay is the soul of lumber men who died or were killed during the logging drives. The photograph shows a Canada Jay bravely helping himself from a camper's frying pan.

CHAPTER IV. Continued.

Alan's estimate that his quarry could not be more than half a mile in the lead, was true enough; but a stern chase is a long attack, and if those bandits were aching from exhaustion, they had the fear of death in their hearts to goad them on.

A whole hour, an hour of terrible labor, went by, and still no sight or sound of the bandits. With the responsibility of this patrol on him, with human lives, the lives of comrades, at stake, a fear gripped Alan that those bandits had taken the south branch of the Alaskan. If they did, Frank Pedneault and those two red recruits might run into an ambush, or Ped might attack them, reckless fellow that he was, practically lone-handed, and get killed.

The chase was entering the Thali-Azzah itself, that watery wilderness of lakes and labyrinthine channels and muskeg thousands of square miles in extent. Not far ahead the branch split into a dozen channels leading in every direction. Pursuit would end there. A few miles more, and these canoes would be swallowed up in the watery oblivion of the Thali-Azzah. But then, as he skulked around a headland, his prophesy yesterday, Haskell, and his conviction, founded on long man-hunting experience, that those bandits would surely follow this left branch, were suddenly proved true to the letter. On ahead, a scant thousand yards, he caught one fleeting glimpse of two heavily laden canoes that carried six men.

Dipping faster, deeper, he and Bill and Larry paddled at a furious pace to come up within rifle range. The river was so winding that they could see only a few hundred yards in front. There was danger, a terrible danger, of running headlong into a blind ambush where all three of them would be killed outright and their canoes sunk before they even could start to shoot back. Every stroke, every curve, every change of flags they skinned close past, was a deadly peril. They knew it, but they dared not slow up. They were taking their chances.

As they skirted out upon a shallow little lake fringed about with tall flags, Larry suddenly heaved back on his paddle.

"NOW I FEEL FULL OF PEP"

After taking Lydia E. Pinkham's Vegetable Compound

That's what hundreds of women say. It steadies the nerves... makes you act better... sleep better... relieves periodic headache and backache... makes trying days endurable.

If you are not as well as you want to be, give this medicine a chance to help you. Get a bottle from your druggist today.

W N U 1077

"Lift out! Look! Alan, look over there!"

Alan looked where he pointed, at the north shore, at the wall of dense reeds. A path had been broken through the flags there; the reeds were parted, some of them trampled, their tops bent to either side.

It told the story to him. Hard-pressed, these men had whipped ashore to shake off pursuit; had lifted canoes to shoulder, and were trying to cut north and hit another channel. Obvious to ambush danger, they skinned over to the teltite break in the flags and drove out upon the mud. Alan and Bill swung the canoe upon their shoulders; and with Larry in the lead, following the signs as they started at a lope back through the flags.

Within a few hundred yards they came to a little creek, a sluggish muskrat highway that led north. The bandits had taken to it. Two shallow reed canoes, they had had to wade. So recently had they passed, the water was still rolled from their boots.

The little creek took Alan's party a thousand yards north to a lake, a deep blue lake covering several acres; and there, within the Thali-Azzah itself, late in the afternoon, the long relentless chase came to its end.

Larry, a dozen steps in the lead, glimpsed the silvery sheen of water ahead; and stopping dead-short, motioned Bill and Larry to be cautious. They belled forward toward the lake edge where the flags were thin and they had clear view.

After several minutes of waiting, Larry pointed across the lake and stated quietly:

"You see that big patch of brownish flags over there, about thirty or forty yards back from the shore? That's where our men are hiding. They're laying low along that little run. I just noticed a rat start up that run. He came back in a hurry. Then, there's a silent spot over there where I don't have any very good signs. And then some other signs. . . ." He was silent for half a minute. Finally he whispered: "I'll show you a sign. You see that pair of canvas-backs a-coming this way? They're flying low, making for this lake. Canvas-backs like blue water. Watch 'em close."

Skimming just over the flags, the pair of graceful ducks came on; but just as they stopped beating and started the glide down upon the lake, they suddenly breasted high up in the air, exactly over the spot Larry had indicated. Veering away, they winged swiftly out of sight into the west.

Lying there in the reeds and bog, Alan studied the bandit covert and tried to plan. If all five of his men had been along with him, the outcome would have been swift and certain. He could have come at the bandits from either side, cut off any chance of escape, boxed them between two fires and deliberately shot them down. But he had split his party at the Alaskan Forks, as Haskell ordered. Now, at the crucial hour here in the Thali-Azzah, Pedneault and those other two men, uselessly following that south branch, were a hundred and forty miles away.

He planned, rejected and planned again, and finally came to a decision.

"We've got to carry the fight to them, and we've got to keep them from getting away by that creek yonder. There's only one way I can do both those things. Bill and I are going to circle around them on foot and come at them from the other side. We'll get there somehow, even if we have to swim part way. With any luck at all we ought to get into a position where we can put two or three of them out of business at the very beginning, before they wake up to us. They won't fight if they can help it. Why should they take chances on some of them getting wounded or killed, if they don't have to? They'll try to whip back across this lake and dodge into that channel yonder. Now, Larry, you'll stay here to head that off. Keep out of sight yourself; have a couple of extra muskies handy; and wait till they get into the middle. When they get in good range, open up on them. Sink those canoes. We don't care about those men. Let them swim ashore and hide if they want to. On foot a man can't make ten miles a day in this muskrat country. With no tent, no shelter, the mosquitoes

and flies would drive them crazy in less than a day, and they'd fall into our hands. If you understand now what's cut out for us, we'll be starting."

Both men nodded. Bill and Alan backed away with infinite caution, for one flushing waterfowl would raise all the others. Yard by cautious yard the two men slipped back into the mud, till they were a safe distance from the lake.

Then they began the long hard job of circling around the bandits.

Wet, muddy, tortured by insect pests, they pushed steadily on, mindful of coming twilight.

It took an hour and a half to make the wide careful circle and start coming in toward the bandits from the north. With the sun cut in two by the western horizon and the chill of twilight in the air, those six men would shortly be on the move. But Alan's hopes had risen again; it seemed that he had taken his luck along. The bandits did not know they were being stalked. In half an hour more, if luck held, he and Bill would be in position to open on them all unawares.

Dropping at last to hands and knees, the two of them crawled along through musk and water, keeping only their guns dry. They came up within a hundred yards of their quarry.

As he parted the reeds in front of his face Alan saw the tops of a clump suspiciously. A moment later he glimpsed the dim outline of a man standing up, stretching himself, sitting down again.

In actual sight now, those men who had killed Jimmy Montgomery! And only a pistol shot away! But to take them. . . Alan crouched savagely at the thought of Pedneault and those two men a hundred and forty miles distant. As he remembered what Haskell said about the Law being behind his patrol, his lips curled in scorn at the cant expression. . . . "The Law that's supposed to be back of us, I wonder where in h— it is now! What does it mean to Bill and me now?"

Here in this watery wilderness in the creeping twilight, he and Bill were going up against six men who had stood off fifty and who had murder charges hanging over their heads. And if they broke away, Larry single-handed would have to stand the whole brunt of stopping them.

They Came Up Within a Hundred Yards Of Their Quarry

At his gesture Bill slid cautiously up beside him. In whispers, Alan said to him: "Bill, we've got to get closer. We've got to get across this bog. Those muskrat houses out there are particularly good luck for us. By keeping down in the water, with these little reeds to help hide us, we can sneak from one house to the next. The last one isn't a dozen yards from those men. If we make it we'll have point-blank range and the best kind of cover to shoot from."

Taking off their hats and jackets, they wriggled carefully out of the tall flags, eased into the water and squirmed toward the first muskrat house, which stood up four feet above the surface and entirely hid their approach. Behind it they stopped a moment, chose their next one, and sunk back into the water.

As they crouched down behind the third little dome of mud and reeds, a lowering red-bearded man parted the flags they were staring at, bent and scooped up a handful of water, took a swallow, threw the rest down with an oath at its vile taste; and then shake-

Throw OFF That COLD!

Some men and women fight colds all winter long. Others enjoy the protection of Aspirin. A tablet in time, and the first symptoms of a cold get no further. If a cold has caught you unawares, keep on with Aspirin until the cold is gone. Aspirin can't harm you. It does not depress the heart. If your throat is sore, dissolve several tablets in water and gargle. You will get instant relief. There's danger in a cold that hangs on for days. To say nothing of the pain and discomfort Aspirin might have spared you. All druggists; with proven directions for colds, headaches, neuralgia, neuritis, rheumatism.

ASPIRIN

TRADE-MARK REG. IN CANADA

ing the water out of his hat, he disappeared again.

Alan's last secret doubt about those bandits being utter strangers in the country was dispelled now. He had had a clear view of this huge red-bearded leader; he could say positively, as Ashmun and all the passengers had sworn, that he had never laid eyes on the man before.

To Bill he whispered: "When we reach that last house, I'll splash or do something to draw their attention. They'll come out to the flags edge again to see what it is. Don't shoot when just one man shows up. We'll wait till we have three of them in plain sight. If we get three of them at the first crack, we'll be fighting the other three on even terms. Now, Bill, when you're looking down a rifle barrel at those men, don't hesitate. Aim straight. We can't make prisoners of that outfit. This is a finish fight. One of the other party is going to get wiped out."

They started for the fourth muskrat house.

(To Be Continued.)

THE RHYMING OPTIMIST

By Aline Michelle

CHOICE

I'd rather see your eyes aglow
With faith and love and gladness,
As once I met when the world was
Was gay with April madness.

I'd rather see your smiling eyes,
So brave, clear and tender,
Than all the gems of all the kings,
Albaze in regal splendor!

I'd rather hear the voice of you
In happy laughter flowing,
As when I heard it on a day
When April winds were blowing.

I'd rather hear your lulling voice
In maddening laughter ringing,
Than cherubim and seraphim,
And all the angels singing.

Many Have Decoration

French Legion Of Honor Held By
153,049 Persons

Holders of the Legion of Honor now number 153,049, according to statistics just published in Paris. This number includes thousands of foreigners who have been awarded the coveted decoration which all Frenchmen aspire to gain. The chevaliers number 125,150, the officers 21,213, and the commanders 5,115. Holders of the Grand Cross total only 78.

"I think your picture's adorable. It breathes the very spirit of dawn. What are you going to call it?"
"Sunset."

Little Helps For This Week

"When He giveth quietness, who then can make trouble."—Job 34: 29.
"None of these things move me."—Acts 20: 24.

I've many a cross to take up now,
And many left behind;
But present troubles move me not,
Nor shake my quiet mind.
And what may be tomorrow's cross
I never seek to find;
My Father says "Leave that to me,
And keep a quiet mind."—Anon.

Let us then think only of the present, and not permit our mind to wander with curiosity into the future. This future is not yet ours; perhaps it never will be. It is exposing ourselves to temptation to wish to anticipate God, and to prepare ourselves for things which He may not desire for us. If such things come to pass, He will give us light and strength according to our need. Why should we desire to meet difficulties prematurely, when we have neither strength or light as yet provided for them. Let us give heed to the present, whose duties are pressing. It is fidelity to the present which prepares us for fidelity in the future.—Fenelon.

U.S. Unemployment

Estimated That 11,590,000 Were Out Of Work In November

An "all-time peak" of unemployment in the United States was reported recently by William Green, president of the American Federation of Labor, who estimated that 11,590,000 were out of work in November.

Noting that this figure was greater by 130,000 than the previous high mark, reported for August, he added that word from affiliated trade unions indicated the total for early December was even greater than that for the previous month.

They say Shakespeare never laid the same story twice, but there's nothing unusual in that. Plenty of court witnesses have the same record.

Election Statements

To the Taxpayers of the Town of Didsbury.

Having had the privilege of representing you as Mayor for the past 14 years, I have appreciated that privilege very much. I again appeal for your support for the succeeding term of 2 years.

During my term of office you are mostly all aware that this town has progressed from one of little or no credit to one of the strongest, financially, in the province, and taxes have gradually decreased during my term of office. Also that the taxpayer has always had first consideration, and that the town has been run on an economical, safe and sound basis.

Up to this time there has been no constructive criticism from my opponent, Dr. W. G. Evans, who, I understand, is sponsored by the Civic Research Bureau, which came into being some time ago, having Mr. J. W. Phillipson and Mr. H. Lynch-Staunton as promoters.

I would welcome a Citizens' Research Bureau which would be of use to the community as a constructive critic. The Civic Research Bureau, apparently, has a destructive policy, its avowed object, as frankly stated by Mr. Phillipson, the leader, is to get rid of the secretary-treasurer of the town for no other reason, apparently, than that he has done his duty as a collector of taxes. It is therefore evident that the motives actuating the Civic Research Bureau are ones of personal grudge and petty spite.

This is a good town, why not keep it a good town and let the element of petty spite and meanness enter into our town affairs.

I appeal to you for your support at the forthcoming election for your assistance in the election of tried and experienced business men, so that the town's position may be maintained in good shape.

H. W. CHAMBERS,

The Editor,
Didsbury Pioneer.

Sir,

I would like to make it clear to all the Electors of the Town of Didsbury that my candidature for the office of Councillor is not in any way sponsored by Mr. J. W. Phillipson's Reform League or the Citizens' Research Bureau.

My policy is one for the good of all citizens and not one to satisfy the personal grudges and petty spite of the few.

Yours, etc.,
W. T. PITT.

Elkton Notes.

As the last club dance was such a success, it was decided to hold another one on February 17th.

Mrs. Dobson and son were guests of Mr. and Mrs. E. Lowrie on Sunday. In the afternoon they attended church at Inverness and report a splendid gathering and a fine service.

The whist drive Tuesday night was well patronized, twelve tables playing. At the conclusion lunch was served and Mr. C. Rowell sang three songs before he was allowed to go.

WITHDRAWAL OF NOTICE OF POLL.

Didsbury School District, No. 652, Trustee Elections, 1933.

Whereas J. E. LIESMER, nominated for the office of School Trustee, has withdrawn his candidature for the said office, leaving J. V. Borselt, W. G. Evans and J. W. Hallon the only candidates therefore, I hereby give notice that no voting for the said offices will take place on the 13th day of February, 1933.

DATED at Didsbury this 8th day of February, 1933.

W. A. Assin,
Returning Officer.

FURNITURE REPAIRING—All kinds of furniture repaired, and my prices are very reasonable. See
NOBLE COLE
Didsbury.

LOCAL & GENERAL

A fowl supper at Knox United Church, Monday 13th February Everybody 25c.

Evansong and sermon at the Anglican Church of St. Cyprion on Sunday evening at 7.30 o'clock. Preacher, Rev. A. D. Currie.

The sermon subject at Zion Evangelical Church on Sunday morning will be, "Christ Our All," and in the evening, "The Call of Abraham."

A mixed bonspiel is being arranged, but the date is not yet fixed. Two ladies and two gentlemen will comprise each rink. It is expected to get the bonspiel under way at the end of the present curling schedule.

Mr. W. H. B. Sharp wishes to announce that he has discarded his old disc machine and is installing a brand new Movietone apparatus. This will necessitate a slight pause at the end of every two reels. By using this machine the projectionist will be enabled to eliminate all dark screens and blank film. Mr. Sharp hopes to obtain another Movietone in a week or two, when there will be no stoppages at all, thus giving his patrons high-class entertainment.

An event of more than passing interest to our readers will be the recital presented by Miss Norma Piper, Western Canada's leading singer, on Friday, February 24th in the Opera House under the auspices of the Masons of Didsbury. Miss Piper, who has appeared many times on the concert platform in various centres throughout the west during the past two years, has endeared herself to her audiences with her charming personality and rich, resonant voice. Her programs include, in addition to some lovely operatic numbers, English numbers that have called for unanimous applause. The people of Didsbury can look forward to an excellent treat on her appearance here February 24th.

Melvin Notes

Miss Ruth Johnston is nursing at the Didsbury Hospital this week.

Mr. and Mrs. August Krebs spent Sunday with Mr. and Mrs. W. Brown.

Mrs. Harry Levagood, Mildred, Joyce, and Miss Dorothy Young motored to Calgary on Saturday.

In the club notes Saturday night at Melvin it was mentioned that some of the young people went to Hartmann and some to Grand Centre on Friday night. All report as having had a good time.

Congratulations to Mr. and Mrs. Gregg upon the arrival of a young daughter last Thursday. We are also congratulating Mr. and Mrs. Hermann Weicker upon the birth of a little daughter at the Didsbury Hospital.

Mr. and Mrs. Ben Kreuger and Mr. and Mrs. August Krebs were among those who attended the old time dance at the home of Mr. and Mrs. Lee Sanderman on Friday evening.

Mr. and Mrs. N. S. Clarke, Mrs. & Mrs. E. Clarke, Mr. and Mrs. W. Hillyard, Mr. and Mrs. W. J. McCoy and Mrs. Alexander motored out from town Saturday night, giving Mr. and Mrs. John Clarke a most pleasant surprise by spending the evening with them.

Those from a distance who attended the funeral of little Gordon Johnston, were Mr. Thos. Johnston and Willie, and Mr. and Mrs. Jimmie Johnston, all of Drumheller; Mr. and Mrs. Ed. Vetter, Three Hills; Mr. and Mrs. Ellis Gale, Mr. and Mrs. Russell Gale, and Mr. William Gale, all of Calgary; Mr. and Mrs. Clarence, of Airdrie, and Mr. and Mrs. F. C. Gale and family, of Three Hills.

Burnside Notes.

The Lone Pine W. I. met at the hall on Thursday last with a good attendance of members and visitors. Mrs. Bowles gave a reading. The next meeting will be held on the first Thursday in March, when Mrs. Eckel will take the topic "Friendship."

Burnside U.F.A. will meet in hall next Monday evening, Feb. 13. Mr. George Burns will give his report of the convention, and Mr. W. Scheidt will report on co-operative marketing. A good program is being presented, and lunch served.

Meet Me At RANTON'S

"The decrease in freight car loadings which began in 1929 has continued almost unintermittently. In 1931 up to the end of the first week of December, 558,559 less freight cars had been loaded on all Canadian Railways than for the same period of the previous year. During the same period of this year 376,016 less cars were loaded than in 1931. The decline in passenger loadings has been relatively the same. The resultant effect upon railway earnings has been naturally disastrous. For the first ten months of 1931 Canadian Pacific gross revenue declined 22.1 per cent compared with that of 1930. For the first ten months of this year now closing there was further decline of 15.4 per cent. The decline continues, and there certainly appears to be no evidence in sight that for many years we shall see them entirely eliminated and our earnings back where they were in 1928."—E. W. Beatty, K.C., Chairman and President, Canadian Pacific Railway, in his review of 1932.

In the vanguard of the winter vacation traffic to the South Seas and the Orient, the Canadian Pacific liner "Empress of Japan" cleared the Narrows at Vancouver January 14 with a list of 411 passengers.

Recent payment by Great Britain of \$50,000,000 war debt instalment, remains old-timers of gold was shipped by Canadian Pacific Express from Asia to England, via Canada, and was carried across the Dominion on a special Canadian Pacific train, having absolute right-of-way. The train travelled without lights and was protected by scores of armed guards.

"Dark and uncertain as the outlook may appear to the casual observer, I still think that in this wilder field the year has not been without important developments leading towards trade stabilization and encouragement."—E. W. Beatty, K.C., Chairman and President, Canadian Pacific Railway, in his review of 1932.

"Through intelligent education the economic and social futility of war will eventually be recognized," is the view of Sir Norman Angell, British economist and disjecter of war as a business. He was recently by Canadian Pacific liner "Montrose" after a lecture tour in the United States.
